Use Quick Connect for Apps

Using Quick Connect

To sign in to a supported client, you have to enter the Quick Connect code in your user settings.

Settings (Top Right) > Quick Connect

If the code is validated successfully, your new device will be signed in without entering your Jellyfin username or password on the new device.

The client will generate a 6 digit code, which you have to enter in the already signed in client in your user settings.

Quick Connect

Enter code ██████ to login

Got It
