

Keep your server running smoothly

In order for your Appbox to always operate fast and smooth, it is important to take some steps to configure some settings on the Dashboard, as well as keeping up with some maintenance tasks on your appbox, at plex.tv

Making sure your appbox restarts daily

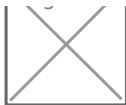

One of the cool features here, is the ability to schedule your server to automatically restart daily. Navigate to server settings and make sure to schedule your server for daily restarts

Important steps to take regularly

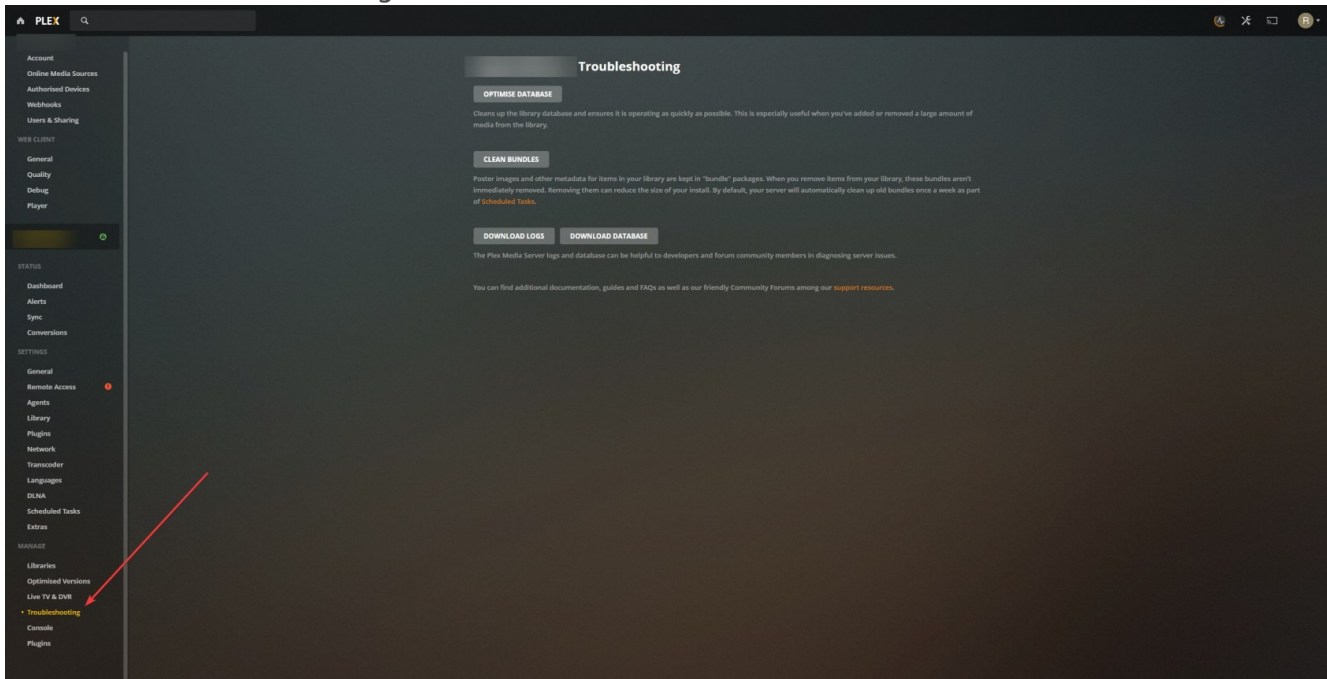

Plex allows you to run some maintenance tasks via plex.tv web panel that'll help keep your server snappy. You should run these weekly or bi-weekly.

1.

Access the settings dialog button

2. Browse to "Troubleshooting"

3. Clean Bundles
4. Optimize Database
5. Reboot appbox
