

The TV Schedule

All customers have access to the TV schedule, the TV Schedule shows the status of previous, and upcoming TV episodes that we are monitoring.

The TV schedule indicates status in a simple color format

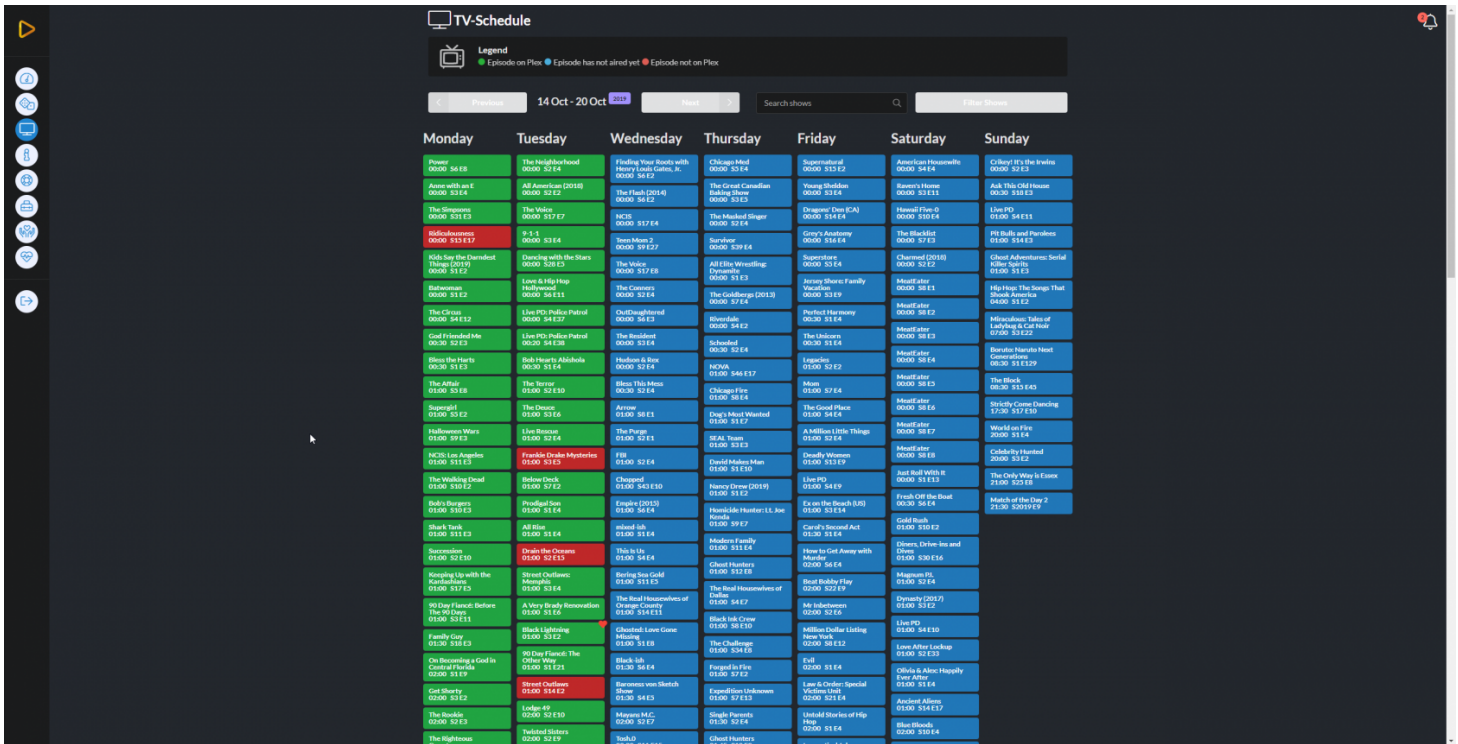

In the calendar, **Green** indicates that the episode is available - **Blue** indicates that the episode have not yet aired, and thus should not be available on your appbox - **Red** Indicates that the episode has aired, but is not yet available.

If an episode is marked as **Red**, a few reasons could be at fault

1. It is not possible to find any download links, and so it was not downloaded
2. It was possible to find download links, but not in a resolution we want

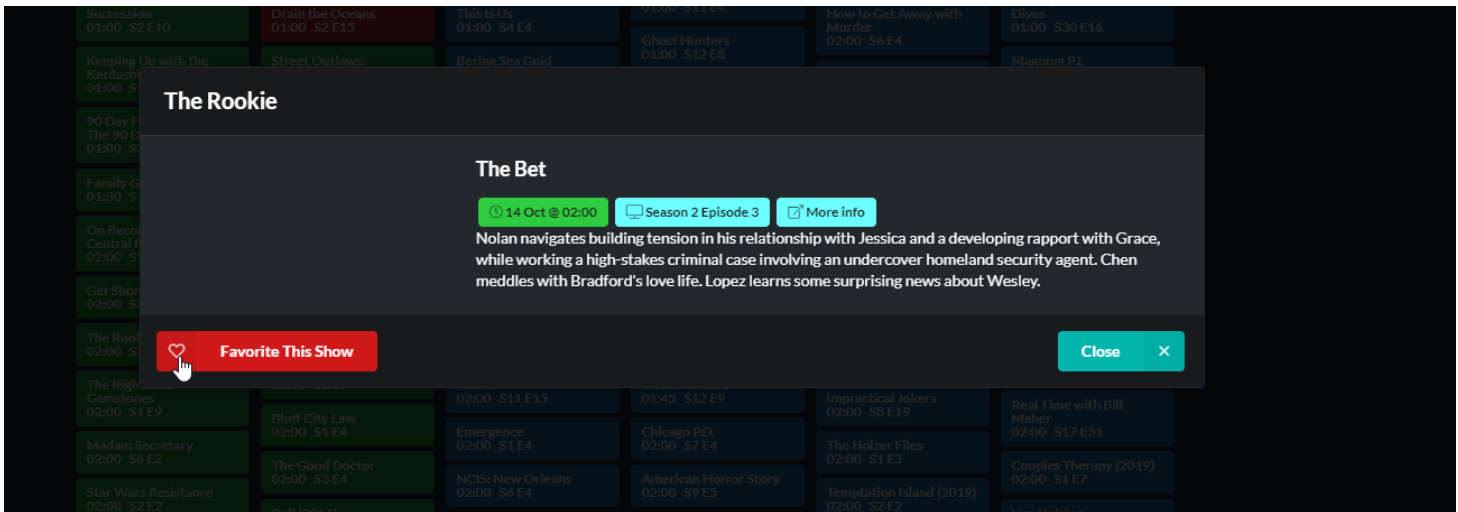

The full calender is illustrated below

Get notified by email, when an episode is available!

An important feature of our TV schedule, is the notification system - It is possible to "like" shows on the calendar, and get notified via email when new episodes of your "liked" shows are added, allowing you to easily know when you should initiate a server scan to catch the episode!

1. Click the show you want to monitor, then click the "Favorite this show" button

2. Your favorite shows are shown in the general calender view, illustrated by a tiny heart

Thats it! You will never miss an episode again!
